Agung Prietno, Freelance Data Scientist & Graphic Designe

Introductions

Freelance Data Scientist & Graphic Designer with over 1 year of experience. Experienced in data prediction and analysis based on historical data, as well as creating visual designs for a coffee business, including posters, logos, and advertising materials for a coffee brand.

I continuously strive to improve my skills and stay current with the latest trends. My goal is to become a leading data science and graphic design expert, delivering innovative and impactful solutions across every project I undertake.

SOFTWARE SKILL

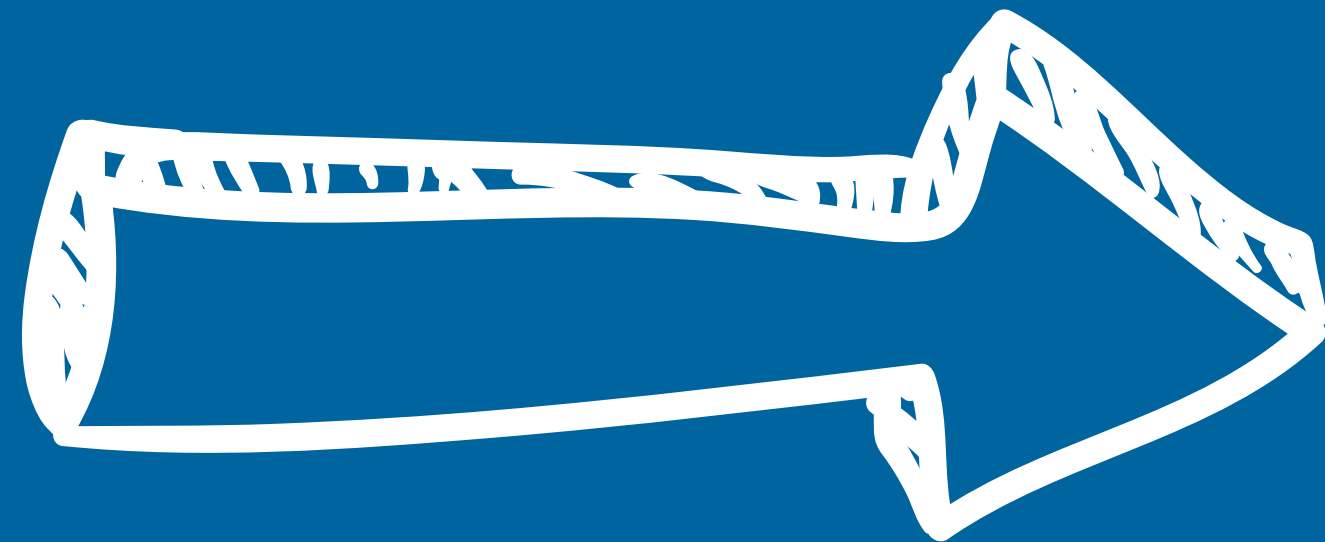

- Poster Design
- Logo Design
- Visual Design
- Data Cleaning
- Time Series Forecasting'
- Data Visualization

**LET'S EXPLORE
WHAT MY PROJECTS
CAN DO**

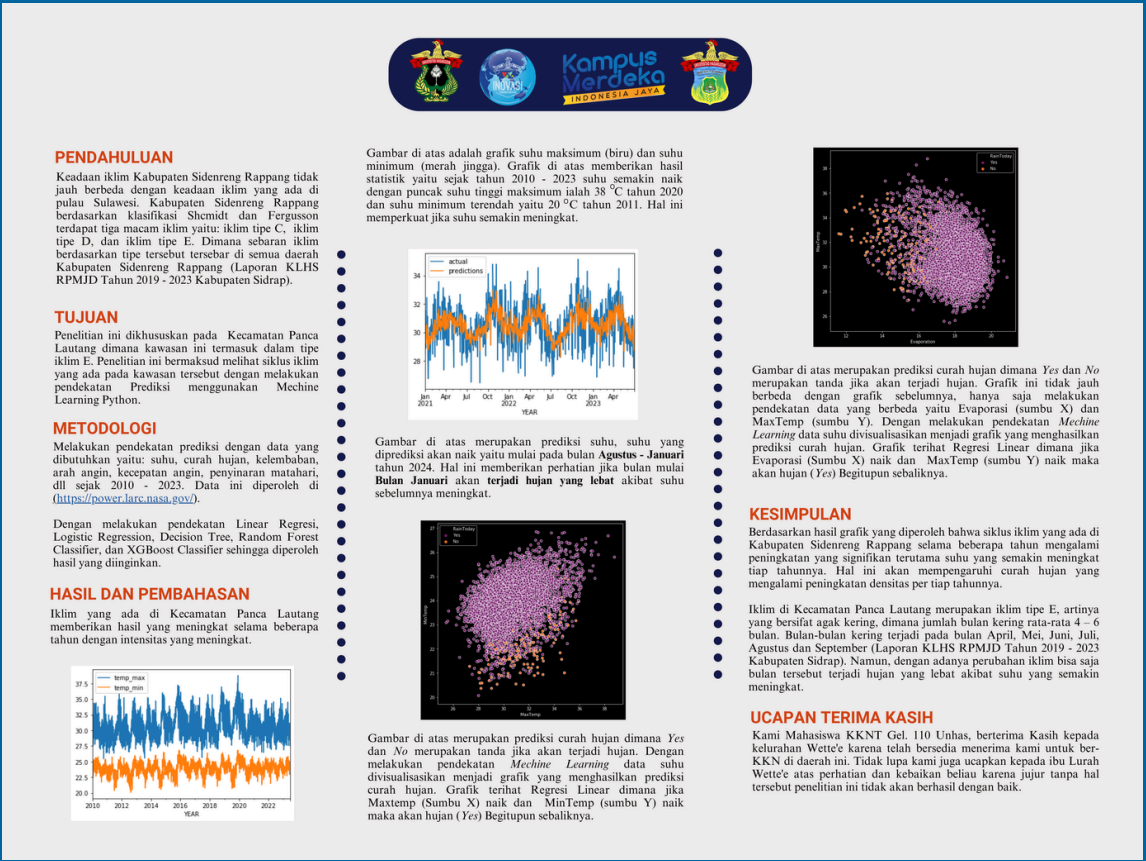

I specialize in analyzing historical data to build predictive models. I have worked on multiple projects involving trend analysis and forecasting, and I am highly dedicated to developing my skills in data science, particularly in understanding patterns and making data-driven predictions.

Time Series Forecasting

Poster Design

I believe that simple and minimalist poster design is highly effective because it emphasizes the importance of information. At the same time, I push my creativity to ensure each design remains visually engaging. My work blends minimalism, innovation, and creativity to produce designs that are both impactful and memorable.

My approach to logo design reflects my poster design style, focused on creating memorable visuals. I believe a great logo should be simple and minimalist, while still carrying a strong philosophy behind it. Therefore, I strive to design logos that are clean, impactful, and easily remembered, while maintaining a fresh and modern feel.
